

Solar System

Across

- 4 Large Gaseous planet and seventh from the Sun
- 9 All matter and energy considered as a whole
- 10 Third planet from the Sun
- 12 Group of stars, gas and dust held together by gravity
- 14 The Sun together with the nine planets and other bodies
- 17 Smallest planet and usually farthest away from the Sun
- 18 The natural satellite of Earth
- 19 Second planet from the Sun

Down

- 1 Average distance from Earth to the Sun (150 million Km)
- 2 Meteoroid that burns up in the Earth's atmosphere
- 3 Largest planet and fifth from the Sun
- 5 Sixth planet from the Sun
- 6 The path of a celestial body as it travels around another body
- 7 Large gaseous planet similar to Uranus, usually the eighth planet from the Sun
- 8 The galaxy containing our solar system
- 11 Fourth planet from the Sun
- 13 Mass of dust and rock particles mixed in with frozen water, ammonia and methane: consist of a nucleus, a coma and a tail
- 14 The star around which the planets in our solar system revolve
- 15 Any of the numerous small bodies that orbit the Sun
- 16 Planet closest to the Sun
