WELCOME TO SCIENCE AT THE FRINGE

Inspiring South Australia welcomes you to another fascinating program of science themed shows in 2024. We are delighted to again partner with Adelaide Fringe to present a guide to Science at the Fringe plus an award for the best science themed show.

Science at the Fringe is where creativity and curiosity collide in a celebration of the symbiotic relationship between science and art. Our guide invites you to explore an array of science themed performances which illuminate the extraordinary often hidden in the ordinary, proving that science is not confined to laboratories but is an integral part of our everyday lives.

You're invited to embark on an adventure as artists and scientists join forces to entertain and inform. Topics range from physics to wine, to bettongs presented in venues as diverse as the Planetarium, nightclubs and the Adelaide Botanic Gardens. There is genuinely something for everyone so come and explore scientific themes, see shows exploring the use of new and emerging technologies, such as virtual reality, 360 film experiences and even interactive shows you help control via your phone.

Science at the Fringe is a celebration of the intersection of art and science. As you delve into the performances, you'll discover how the blending of arts and science invites us to perceive the world in new ways, fostering a sense of awe and curiosity.

The Science at the Fringe Award is presented to the best STEMM (science, technology, engineering, maths and medicine) themed show at Adelaide Fringe 2024 by Inspiring South Australia. Whether you're young or young at heart, I hope you enjoy some science at the Fringe.

Happy Fringe!

Alison Kershaw

Manager, Inspiring South Australia

For the 7th consecutive year, Adelaide Fringe has partnered with Inspiring South Australia to craft an extensive Science at the Fringe Guide for the 2024 season. The 2024 Fringe program boasts an impressive line-up of over 1300 shows spread across more than 500 venues throughout Adelaide and South Australia, offering a diverse range of experiences for everyone, particularly those fascinated by science!

To assist science enthusiasts in navigating the 2024 Fringe program, we've put together a guide highlighting over 55 shows that blend science with visual arts, theatre, comedy, magic, and more. You can find science themed shows in the Freemasons Hall, Botanic Gardens, Sleep's Hill Tunnel, Adelaide Planetarium, Migration Museum, the Adelaide Gaol, MOD. At UniSA and many more. Whether you're seeking educational shows or just want some Fringe fun, there's a plethora of options for you to explore. You can even filter by Science on the Fringe website to simplify the process of selecting a show.

We extend our gratitude to Inspiring South Australia for their efforts in creating this informative guide, and we encourage you to attend as many shows as possible. Wishing you a fantastic Fringe experience!

MUSEUM

Inspiring South Australia works to create personal connections to STEMM (science, technology, engineering, maths, and medicine) through experiences to learn more about research, innovations, industries, and the opportunities available for education, employment, and enjoyment.

We collaborate with the scientists of all kinds, government agencies, citizen scientists, artists, universities, industry and communities to make the STEMM in our everyday lives, and in our futures more visible, to inspire, to harness curiosity and to broaden scientific literacy.
